WORK EXPERIENCE

Staff Software Engineer

C2FO

05/2022 - Present

Achievements/Tasks

- Utilized both lab data and field data for Core Web Vitals to boost Web Performance.
- Co-manage an internal component library built upon Material UI, using Storybook for documentation.
- During a Hack Week, I Pitched the idea of introducing PWA support for our Web App and its deployment to the Play Store using Trusted Web Activities(TWA). Following endorsement from product leadership, I successfully led the implementation and launch on the Google Play Store, enhancing our Web App's accessibility and reach.
- Collaborate with Product and Engineering Managers to identify blockers and assess technical feasibility in roadmap discussions.

Engineering Lead

C2FO

10/2020 - 05/2022

Achievements/Tasks

- Oversaw the engineering team to ensure project quality and adherence to deadlines, while also committing 50% of my time to individual contributions.
- Led the migration of our Web App from AngularJS(1.x) to React, achieving enhanced performance, and reduced feature development time.
- Incorporated TypeScript for type safety and established a robust testing suite with Jest and React Testing Library.

Senior Software Engineer (Full-Stack)

C2FO

01/2020 - 10/2020

Achievements/Tasks

- Migrated a segment of our monolithic backend: developed a microservice using NestJS (built on Express and utilizing TypeScript) and migrated REST APIs to GraphQL. This enabled independent development and deployment processes.
- Provided technical leadership, upholding code guidelines through code reviews.

Senior Software Engineer (Frontend)

Dineout (Times Internet)

11/2018 - 01/2020

Achievements/Tasks

- Led the development of Dineout's Desktop and Mobile PWAs.
- Successfully transitioned Dineout's web app from MarkoJS to NextJS. With a focus on performance, this move elevated our Lighthouse scores from the 60s to 90+.
- I was solely responsible for the Restaurant Listing page, Homepage for GIRF (Great Indian Restaurant Festival) and the User Stories Page.

Software Consultant(Full Stack)

Polestar Solutions & Services India Pvt. Ltd.

11/2016 - 11/2018

Software Engineer(Frontend)

Invansys Technologies

02/2015 - 10/2016

Github Actions

Micro Frontends

NestJS

GraphQL

OPEN SOURCE

Initiating my Open Source journey

- Axios:** 1 PR merged for a TypeScript type fix and currently have an **open and approved PR** for improving response interceptor type definitions.
- Bubblewrap (Google Chrome Labs):** Contributed a documentation improvement while deploying C2FO's Web App to the Google Play Store using Trusted Web Activities (TWA).

EDUCATION

Bachelor of Technology

Kurukshetra University

AWARDS & RECOGNITION

Winner of a CSS Challenge, hosted on CSSBattle.dev

React India Conference, GOA

Consistently recognized with MVP and High-five Quarterly Awards.
